ADDRESS FROM CHAIRMAN

Every journey to the future begins at your feet and blossoms in the far reaches.

I am Zeng Chao, the founder of RCG Construction Co., Ltd. Remaining true to our original aspirations, we grow together; uniting our strengths, we compose a new chapter. Since the founding of RCG Construction, every step forward has been an exploration rooted in the industry through meticulous cultivation. Every milestone of growth is inseparable from the hard work and enterprising spirit of our employees, and even more so, the unwavering support of our partners.

In the past, we have moved forward hand-in-hand, supporting and empowering one another. On the journey ahead, we will continue to evolve. We take it as our mission to achieve more exquisite craftsmanship, deliver superior quality, and provide more comprehensive services. With an unwavering commitment to our goals and a focus on win-win cooperation, we strive to deliver excellence to the market and our clients.

Zeng Chao | Founder&Chairman
RCG Construction Engineering Co., Ltd.

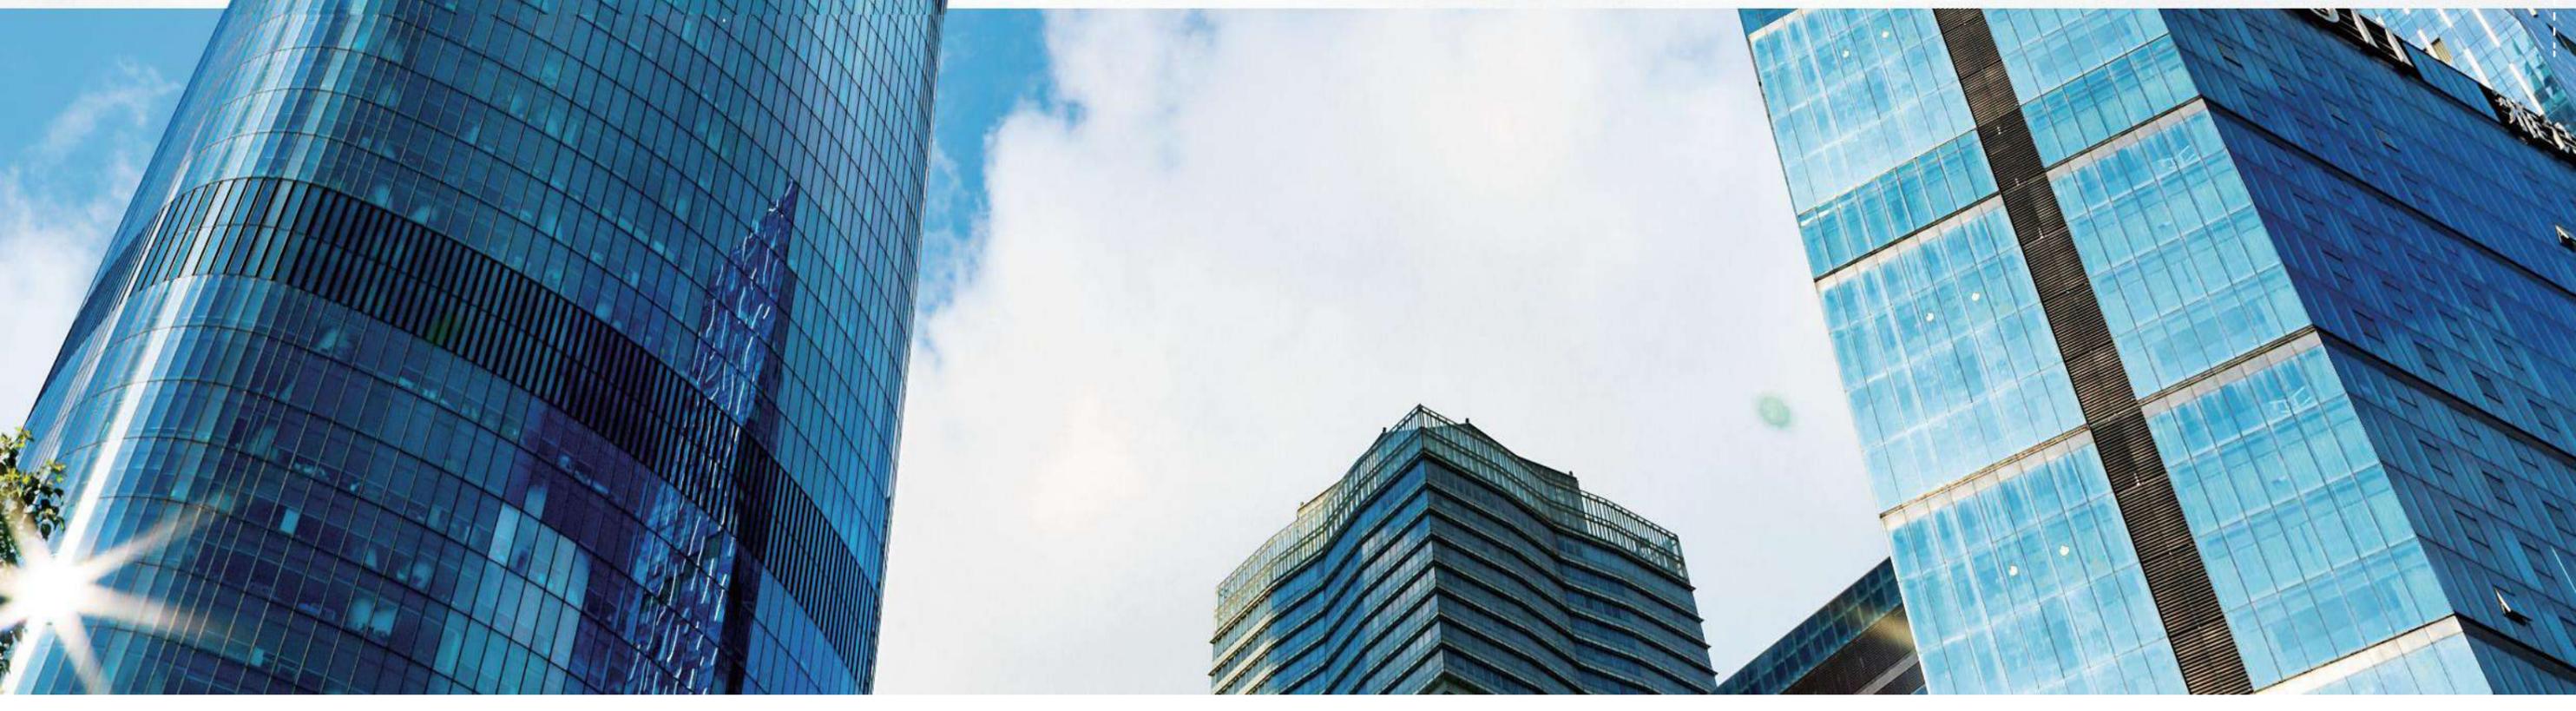

COMPANY PROFILE

Ruicheng Construction Engineering Co., Ltd. is a new type of construction company established as a joint venture by Greek and Chinese shareholders, aiming to integrate the advantages of both countries in the construction field and deeply cultivate the Greek market. The company's main business includes the production and application of construction materials such as steel reinforcement, formwork, and concrete; the contracting and construction of main structures and supporting projects; and the provision of labor dispatch services. It focuses on four core business areas: small-scale construction and large-scale infrastructure projects, Greek home renovation business, commercial and industrial renovation, and factory construction plans for customized material processing (for internal company service only).

Adhering to the principle of "Customer First," the company is always committed to strictly controlling project quality and diligently researching construction techniques to provide customers with higher-quality corporate services. At the same time, it takes on corporate social responsibility, actively empowering and giving back to society with practical actions. With the long-term goal of becoming a leading enterprise in the Greek construction and renovation field, the company aims to provide high-quality, high-efficiency, and innovative construction and renovation services by integrating the architectural wisdom and technology of China and Greece, satisfying diverse customer needs, and promoting deep cooperation and cultural exchange between China and Greece in the construction field.

Enterprise Qualification

ENTERPRISE QUALIFICATION

“Human that has lost his credit is untrustful to the world
No business is perfect without trust”

8 Qualifications

It is the best proof of our integrity as the foundation of our business.

Rui Cheng Construction Co., Ltd. boasts an outstanding construction team and employs professional construction personnel. With state-of-the-art equipment and a team of seasoned professionals, the company is committed to delivering precise solutions tailored to client needs. It has become an industry benchmark for integrity, earning widespread recognition in the market. Currently, the company maintains a strong partnership with Beijing Xinyi Accounting Firm, ensuring stable operating cash flow and balanced growth across all business lines, steadily advancing toward higher goals.

Cooperation & Mutual benefits

WIN WIN COOPERATION

I. China Construction Fourth Engineering Bureau

Established in 1962, China Construction Fourth Engineering Bureau ranks as the 14th largest company among the Fortune Global 500 and is the sole subsidiary of China State Construction Engineering Corporation.

Headquartered in Guangzhou, this major large-scale company has developed iconic landmarks such as Guangzhou East Tower, Guangzhou West Tower, and Shenzhen Jingji 100 Tower, while also constructing multiple mega-scale real estate projects, exhibition venues, and public welfare initiatives. These national-level projects have contributed to the city's prosperity.

Our company has forged a strategic partnership with China Construction Fourth Engineering Bureau, staying true to our founding vision to set the industry benchmark for construction quality.

The Alpha Architecture Conference (Architecture Technology) is the premier annual event in the architectural industry.

First held in Guangzhou every March since 1995, this exhibition showcases architectural design, innovative materials (including UHPC concrete and color-changing glass), low-carbon technologies, and cutting-edge solutions. Spanning over 100,000 square meters, it attracts more than 700 global brands and 80,000+ professional visitors, alongside hosting the Polaris Architecture Awards and industry forums. Through our partnership with Alpha Architecture Conference, we continuously track architectural trends and technological advancements, drive innovation, and inspire creative practices by integrating diverse expertise.

Core Competence | High Market Demand

FEASIBILITY REPORT | MARKET FEASIBILITY

*Home improvement market demand

The booming demand for home renovations is fueling our home improvement business line.

*Building restoration market

By capitalizing on the governments tax incentives for the architectural restoration sector, Ruicheng is now reaping substantial market opportunities.

*commercial real estate investment boom

Commercial real estate prices in major cities like Athens have seen a significant rise, while the tourism boom has boosted demand for commercial facilities such as hotels and retail spaces. Our industrial equipment business holds tremendous potential.

*The Recovery and Growth of Greek Construction Market

Market research indicates that Greeces architectural decoration sector has shown steady growth in recent years, particularly during the first quarter of 2024, creating a favorable macroeconomic environment for us.

*Industrial Architecture and Infrastructure Construction

Greece has large-scale infrastructure projects, and major development initiatives like the Athens Old Airport project foreshadow a thriving construction industry in the future. Our involvement in both small-scale construction and large-scale infrastructure aligns with market trends.
